SUMMARY

Driven and detail-oriented Data Analyst passionate about transforming raw information into meaningful insights. Known for strong problem-solving abilities, critical thinking, and clear communication. Able to break down complex data into simple, actionable findings. Committed to solving real-world problems and contributing to informed, data-driven decisions through analytical thinking and collaboration.

EDUCATION

Bhai Parmanand Business of Studies, Delhi   **August 2023 – June 2026**

Bachelor of Science in Data Analytics

SKILLS

- **Programming & Scripting:** Python, JavaScript, TypeScript
- **Databases:** SQL, MongoDB
- **Data Visualization:** Power BI, Tableau
- **Web Development:** React.js, Node.js, Express.js
- **Frontend Styling:** Tailwind CSS, HTML, CSS

WORK EXPERIENCE

Data Analyst Intern | IBM with CSRBOX, Delhi | [Link](#)   **Jun 24 - Aug 24**

- Completed a structured internship focused on **data analytics, visualization, and machine learning basics**.
- Performed **data cleaning, wrangling, and exploratory analysis** using Python and IBM tools.
- Worked on **real-world social impact datasets**, including sanitation analysis in urban areas, contributing to better data-driven decision-making.
- Built dashboards using **Power BI and Tableau**, showcasing insights through KPIs, trends, and charts.
- Strengthened skills in **EDA, reporting, Excel analytics, and SQL-based transformations**.

Tools: Python, MySQL, Power BI, Tableau, Advanced Excel, EDA, ML basics

PROJECTS

Mern Authentication System | **LINK**   **November 2025**

- Built a secure **MERN-based authentication system** with email verification, JWT authorization, and password reset, ensuring safe and reliable user access control.
- Implemented **end-to-end user management** including account activation, protected routes, and encrypted credentials aligned with industry security standards.

Klimate | [LINK](#)   **September 2025**

- Developed a responsive weather application that delivers **real-time weather updates** using geolocation and city-based search, ensuring accurate and accessible weather information.
- Integrated **OpenWeatherMap API** to display current conditions, humidity, temperature, and a **5-day weather forecast** through a clean and user-friendly UI.

Churn Analysis| [LINK](#)   **April 2025**

- Built an end-to-end **Churn Analysis pipeline** using SQL for data cleaning, transformation, and modeling, and Power BI for interactive dashboards that highlight key churn drivers and customer behavior patterns.
- Identified actionable insights—such as high churn among month-to-month contract holders, fiber optic users, and customers over 50—helping businesses strengthen retention strategies through data-driven decisions.
